Question 19 (7 marks)

- (a) Why is it recommended that the earth lead be removed first and replaced last when disconnecting or connecting an automotive battery? 1

for safety reasons, so you don't get a shock, so you don't damage the battery, & cause it the proper way to do it.

- (b) What does CCA refer to in an automotive battery? 1

Cold Cranking Amps.

Question 19 continues on page 14

Question 19 (continued)

(c) This diagram shows some components in an electrical circuit.

3

Complete the table naming and describing the function of each numbered component.

Component	Name	Function
1	fuse	prevent excessive current.
2	switch	Turn on & off
3	Earthed	connecting or completing the circuit

(d) In the diagram below, draw lines to show how to connect the terminals to increase battery output voltage to 24 volts.

1

(e) In the diagram below, draw lines to show how to connect the terminals to maintain battery output voltage at 12 volts.
